Excursion to the Melbourne Museum

As part of our Curiosity unit with a focus on Minibeasts, Prep students will be travelling to Melbourne Museum on Thursday 12th October. Students will visit the Exhibition 'Bug Lab' and also visit the 'Bugs Alive' Exhibition whilst at the Museum.

Bet you didn't know that bees have hairy eyes. You read right; hairy eyes. Invisible to the naked human eye, there are hundreds of hairs sprouting from the multi-lensed eyes of bees. They grow from between the hexagonal tiles that make up the convex surface of the eye. Each hair tapers at the tip like a human eyelash. But just because we can't see bee eye hair doesn't mean it is a detail to be overlooked.

The aim of the excursion is to stimulate student's curiosity through the study of Minibeasts.
